

PIDS Feature Resource Guide

This resource provides the simple three step process for setting up the API (Application Programming Interface) between PIDS and Online ASQ.

PMC is excited to be partnering with Brookes Publishing to make data entry more seamless. PIDS and Online ASQ can now "talk" to each other through a newly developed API. This API allows PIDS users to import completed ASQ-SE and ASQ3s from Online ASQ into PIDS. There are a few setup steps that are required to ensure the right ASQs are being imported into PIDS. This guide walks you through these required setup steps.
